

TAILOR-MADE!

- ✓ **LOADING, UNLOADING AND STORAGE OF SPECIAL CARGO**
- ✓ **HEAVY LIFT OPERATIONS**
- ✓ **STUFFING & STRIPPING**
- ✓ **REPACKING**

TAILOR-MADE!

At its two container terminals, Hutchison Ports ECT Rotterdam (ECT) also offers the right solution for cargo that is heavy, out of gauge or irregular in any other way. Professionally, at attractive rates and in conformity with the highest safety standards. ECT's service rendering is based on over 50 years of experience. Our Special Services department will gladly provide you with more information.

LOADING, UNLOADING AND STORAGE OF SPECIAL CARGO

Whether your special cargo is long, wide and/or heavy: at the ECT Delta and the ECT Euromax, we safely and efficiently discharge it from or load it onto any container ship. In close consultation, we seamlessly incorporate this into our regular quay operation. The ship always departs as scheduled. If required, we are also capable of temporarily storing your cargo at both terminals.

HEAVY LIFT

The quay cranes at ECT's deepsea terminals can lift up to respectively 75 tonnes (ECT Euromax) and 60 tonnes (ECT Delta). For even heavier loads, we have ample experience in assisting operations using floating cranes (sheerleg). Our employees and the operators of the floating cranes are perfectly in tune with one another. Thus, even the most extreme objects can be loaded and unloaded safely and efficiently.

STUFFING, STRIPPING...

At our deepsea terminals, we have a dedicated area for professionally stuffing and stripping your cargo into or from a container for subsequent transport. Close to the deepsea vessels and with empty containers available in the immediate vicinity, so without any unnecessary movements.

Safely positioning and securing out of gauge cargo on flat racks is one of our daily jobs as well. Or the other way around: from flat rack to truck, for example. There is no need for you to first transport your flat rack with cargo off-site. This saves time and money. Together with you, we consistently select the smartest and most efficient solution.

...AND REPACKING

We also specialise in the repacking of goods from one container to another. We do this at the same dedicated site where we perform stuffing and stripping. You give the order and arrange the go-ahead from Customs, we quickly and professionally arrange the repacking, including gas-free certificate.

24/7

The Special Services department is ready for you 24/7. Simply contact us directly for all special cargo and heavy lift operations, stuffing, stripping and repacking. You can always count on a safe, optimum operation at a competitive rate.

WELL TRAINED, HIGHLY EXPERIENCED

All our employees are well trained, have all the necessary certificates and continuously receive further training. Each assignment is unique, but with more than 50 years of experience in special services, our basic knowledge exceeds that of all others.

FOR EVERY SHIPPING LINE AND FOR THEIR CLIENTS

Special Services works for every shipping line. We also perform stuffing, stripping and repacking directly for transport companies, forwarders and shippers. The only condition for the latter is that you provide us with a commercial release and/or booking number from the shipping line for your container or flat rack.
